

Goals

Modernization

Bring technology solutions to operations with new automated equipment, software and cameras. Revise garage layout to achieve smoother and more efficient traffic flow.

Focus

Updated Technology

Implemented online validation system for tenants doubling the validation revenue. Remote management and automated systems increased efficiency resulting in improved service delivery and customer experience.

Today

Results Delivered

With upgraded systems and streamlined layout, newfound income was generated through monthly customers. Service has improved and traffic flow has been optimized.

600/601 Travis

Houston, TX

A 13-story garage with capacity for 2,195 vehicles, catering to business tenants, restaurant guests and night club traffic.

Since being awarded the parking management contract in 2013, Winpark, Propark Mobility's specialized Class A office parking management company, has delivered uncompromised customer service and increased revenue.

By implementing the TICARD system, single pulled tickets were programmed to manage multi-day stay with expiration date and time, eliminating keycard replacement and card management expense.

New validation software and solid tenant relationships helped us to provide guests with better service, resulting in more satisfied end-users.
